WELCOME TO WHEELING

*President
Dean S. Argiris*

From the Desk of President Argiris

Since becoming President, my hope and aim has been to work through regional organizations in order to proudly represent our Village and be a strong advocate for Wheeling. At the beginning of my term, I was voted in as 6th District Commissioner of the Lake County Stormwater Management Commission by the majority of the district's mayors, and I am honored to have recently been re-elected to this position. I look forward to continuing to represent Wheeling on the important issue of regional stormwater management. I was also recently asked to serve as Secretary of the Northwest Municipal Conference (NWMC) Board for the 2015–2016 term by current NWMC President Elizabeth Tisdahl of Evanston. This is an honor for both me and the Village of Wheeling. These are just a couple of the many ways I continue to do my best to represent and be a voice for our nearly 40,000 residents.

On May 22, I attended an open house and ribbon-cutting to commemorate the rehabilitation of 311 Egidi Drive and the successful launch of Alfa Controls. The Village Board approved a Class 6B incentive last year for the then-vacant industrial property to facilitate the \$1M rehabilitation and subsequent re-occupancy of the 9,984 square foot facility. The event was attended by Congressman Bob Dold, officials from Harper and Solex Colleges, and numerous manufacturing executives. Alfa Controls will manufacture control panels for a variety of industrial applications.

I was also recently honored to attend the Spring Court of Honor for Boy Scout Troop 468, held at our own Westin Chicago North Shore. The troop celebrated the 40th anniversary of their founding and acknowledged the boys who have recently earned rank advancements and merit badges. It was a great privilege to witness these young men receive the honor and recognition they deserve for their years of hard work and dedication. I congratulate Boy Scout Troop 468 on their 40th anniversary of instilling character and responsibility in our young men.

Congratulations also to Wheeling's own Korean Cultural Center of Chicago (KCCoC) who celebrated their fourth anniversary as a part of our great Village on June 20. It's been gratifying to see this world-class establishment serve as a hub of culture and education, delivering classes and hands-on experiences in the areas of language, cultural history and exploration, arts, music, dance, and practical classes that help people make this part of the world their home. I look forward to deepening our relationship with the KCCoC!

On June 4—three years to the day since the project broke ground—we celebrated the grand re-opening of Heritage Park. I want to thank and congratulate the Wheeling Park District, Metropolitan Water Reclamation District, Village Board, and Village staff for their vision and hard work in ensuring the benefit of the Heritage Park project for all Wheeling residents. For generations to come, this project will be a real improvement in the quality of life for Wheeling residents, including the many new residents who will soon be living just a short walk away in the new Town Center. Not only does this project provide flood relief—with six stormwater storage areas with a total capacity of more than 49 million gallons—but also much-desired park amenities such as an athletic complex with new fields, a concession building, a bandshell, and a pavilion.

This represents the culmination of a major undertaking by the Wheeling Park District, the Metropolitan Water Reclamation District (MWRD), and the Village, and at every stage all three stakeholder organizations have stepped up and done their part to make this critical project happen. Today we can enjoy the result of those efforts. This is an exciting time for Wheeling, but there's much more excitement to come.

Because Heritage Park is now in full swing and a groundbreaking at the Town Center location is imminent, our July 3 fireworks have been moved to Chicago Executive Airport in a joint effort with the airport and the City of Prospect Heights. See the front cover and page 15 of this newsletter for more information. This year's celebration promises to be an event to remember. We hope you can join us!

President Argiris, U.S. Representative Bob Dold, and Alfa Controls owner Anton Koretskov.

President Argiris, Senator Terry Link, MWRD Board President Mariyana Spyropoulos, Park District Executive Director Jan Buchs, Park District Board President Keith Pecka

WELCOME TO WHEELING

The Clerk's Corner

*Village Clerk
Elaine E. Simpson*

National Night Out

Remember, Tuesday, August 4 is **National Night Out**. This is a great time to have a get-together with your neighbors and welcome any new neighbors who recently moved into the area. See the next page for details.

Wheeling Historical Society

The Wheeling Historical Society is open on Sundays, April through October from 2–4 p.m. Visit the Historical Society at Chamber Park and enjoy a leisurely walk through the park, then stop by the museum to see the history of Wheeling. It is quite an experience to see how Wheeling was in the past and how far it has come.

Wheeling Food Pantry

The Wheeling Food Pantry located at 101 N. Wolf Road is open to Wheeling residents. Donations are badly needed, especially during the summer months. Donation bins can be found at Village Hall, the Police Station, the Senior Center, and Fire Station 24. All donations are greatly appreciated.

The Wheeling Board of Health is also collecting new and gently-used cloth/canvas grocery bags to be used at the Food Pantry. These bags will be given to families to help them carry their food items home from the pantry. You can drop bags off at the Village Hall in the marked container in the lobby. Bags can also be dropped off at the Prescription Medication and Sharps Collection held on the third Saturday of every month from 10 a.m. until 12 p.m. in front of the Police Station at 1 Community Blvd. Please only bring in grocery-sized bags.

Village offices will be closed
Friday, July 3 in honor of
Independence Day. No Waste
Management delays will take place.

*Brought to you
by the Wheeling
Board of Health*

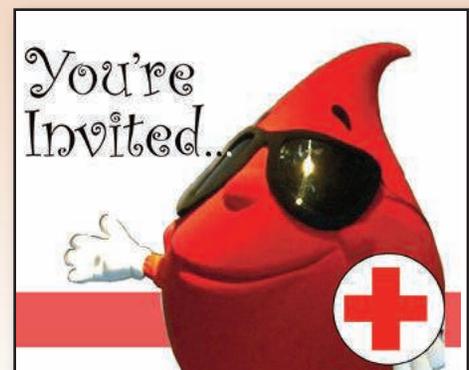

Wheeling Community Blood Drive

The Village of Wheeling and the Wheeling Board of Health will be hosting a blood drive from 2–7 p.m. on Wednesday, July 8 at the Village Hall.

Blood donors of all types are needed every day for critically ill patients, accident victims, people needing surgery, and those patients suffering from chronic diseases such as cancer and leukemia. If all eligible people would donate, there would never be a blood shortage. Every pint of blood donated will help save three lives!

Appointments are appreciated. To schedule an appointment, please call Health Officer Beverly Slaby at 847.499.9045 or e-mail her at bslaby@wheelingil.gov. You may also visit www.lifesource.org to make an appointment; select “Donate Blood,” choose “Make an Appointment,” scroll down the page and search for Group Code WH98.

There will be door prizes of gift certificates from Wheeling restaurants. Please donate. Walk-ins are always welcomed!

POLICE & FIRE DEPARTMENTS

Rockin' with the Cops

Come out to the Wheeling Park District Aquatic Center for a night of family fun on Sunday, August 2 at 7:30 p.m. The pool will be open late for this National Night Out kick-off party. There will be music, games, and fun for the whole family. You **MUST** be a Wheeling resident and **PRE-REGISTER** by July 26 to attend. Please call 847.459.2994 or email your name, address, phone number, and number of people attending to CrimePrevention@wheelingil.gov.

Join National Night Out August 4

National Night Out will be held on Tuesday, August 4. There is still time for your neighborhood to participate!

National Night Out is designed to:

- Heighten crime and drug prevention awareness
- Generate support for, and participation in, local anti-crime programs
- Strengthen neighborhood spirit and police–community partnerships
- Send a message to criminals letting them know that neighborhoods are organized and fighting back.

So gather your neighbors, plan a party, and join over 37.8 million people in 16,124 communities from all fifty states, U.S. territories, Canadian cities, and military bases worldwide in celebrating.

The traditional “lights on” campaign and symbolic front porch vigils have turned into a celebration across America, with various events and activities including but not limited to block parties, cookouts, parades, visits from emergency personnel, rallies and marches, exhibits, youth events, safety demonstrations, and seminars in an effort to heighten awareness and enhance community relations. It’s a wonderful opportunity for communities nationwide to promote police–community partnerships, crime prevention, and neighborhood camaraderie. National Night Out represents spirit, energy, and determination to help make neighborhoods safer places. National Night Out celebrates safety and crime prevention successes and works to expand and strengthen programs year-round.

For more information, or to sign up your neighborhood, contact the Wheeling Police Crime Prevention Unit at CrimePrevention@wheelingil.gov or 847.459.2994.

POLICE • COMMUNITY PARTNERSHIPS

Sign Up for Emergency Notifications

The Village maintains an emergency telephone notification system known as “CodeRed” or “Reverse 911” to alert residents and businesses about emergency situations that could impact them. The system is only used in very serious emergency situations that will affect a large number of residents, such as imminent floods, hazardous material releases, or other serious or life-threatening situations. Unfortunately, as more individuals move away from a traditional home phone and rely solely on a cellular telephone, the system cannot automatically know to contact you in an emergency. To make sure you are contacted, you can enroll yourself and family members by visiting a secure website and manually adding your contact information. There is a link on the Village’s home webpage (www.wheelingil.gov) under “Quick Links” that will automatically take you to the Code Red registration web page.

Your contact information is safe, secure, and never shared with outside parties or vendors. If you change your cellular telephone number or wish to be removed from the system, you will need to log into your private account to change or delete your information. For security purposes, the Village cannot set up or amend a private account. Sign up today so the Village can help you when you need it the most.

Firefighter Association Grants Scholarship

The Wheeling Professional Firefighter’s Association recently awarded Wheeling High School student Darian Los with its annual Gambro Memorial Scholarship. Every year the Association awards a graduate of Wheeling High School a \$1,000 scholarship in honor and memory of former member Fran Gambro. Pictured to the left are Darian Los and Association President Emmett Gribbens.

Village of Wheeling 2014 Annual Drinking Water Quality Report

January 1, 2014 to December 31, 2014

The Annual Water Quality Report, also known as the Consumer Confidence Report, is an annual report required by the Safe Drinking Water Act (SDWA). This report is intended to provide citizens with important information about the Village's drinking water and the efforts made by the water system to provide safe drinking water. The report provides facts, violations (if applicable) and contaminants identified in the water drinking supply during the calendar year of January 1–December 31, 2014.

The Village of Wheeling is committed to providing all consumers with safe and reliable drinking water. The Village of Wheeling is happy to announce that **no** violations were recorded for 2014 regarding monitoring, reporting, treatment technique, maximum residual disinfectant level, or maximum contaminant level. For more information regarding this report, please contact Jeff Wolfgram, Utility Superintendent, at (847) 279-6928 or by email at jwolfgram@wheelingil.gov. *Este informe contiene informacion muy importante sobre el agua que usted bebe. Traduscalo o hable con alguien que lo entienda bien.*

SOURCE WATER INFORMATION

The source of drinking water used by the Village of Wheeling is Purchased Surface Water. Wheeling receives water from Lake Michigan through the Northwest Water Commission (NWWC), which in turn receives water from the City of Evanston that utilizes three water cribs, or intakes, located over a mile offshore in Lake Michigan. Evanston pumps and treats the lake water at their treatment plant. The plant provides the following treatment processes: coagulation/flocculation, sedimentation, filtration, and disinfection. The water is then transported to the NWWC through a 60-inch transmission main to a 25 million gallon reservoir at the NWWC main pumping station. From there, water is pumped into the Village's three receiving stations.

SOURCE OF DRINKING WATER

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which can come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife;
- Inorganic contaminants, such as salts and metals, which may be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming;
- Pesticides and herbicides from a variety of sources, such as agriculture, urban stormwater runoff and residential uses;
- Organic chemical contaminants, including synthetic and volatile organic chemicals which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems;
- Radioactive contaminants, which can be naturally-occurring, or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800.426.4791). In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water, which must provide the same protections for public health.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as those with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their healthcare providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (800.426.4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. We cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

SOURCE WATER ASSESSMENTS

The Village of Wheeling wants customers to be informed about their water quality. The public is welcome to attend Village Board meetings where decisions that affect drinking water quality are made. The Village Board meets every first and third Monday of the month at 6:30 PM at Village Hall, 2 Community Boulevard, Wheeling, IL 60090. The source water assessment for the Village's

supply has been completed by the Illinois Environmental Protection Agency (IEPA). If you would like a copy of this information, please contact the Utility Superintendent at (847) 279-6928. To view a summary version of the completed Source Water Assessments, including Importance of Source Water, Susceptibility to Contamination Determination, and documentation/recommendation of Source Water Protection Efforts, please access the IEPA website at <http://www.epa.state.il.us/cgi-bin/wp/swap-fact-sheets.pl>.

The Illinois EPA considers all surface-water sources of community water supply to be susceptible to potential pollution problems. The very nature of surface-water allows contaminants to migrate into the intakes with no protection, only dilution, which is the reason for mandatory treatment for all surface water supplies in Illinois. All three of Evanston's intakes are located far enough offshore that shoreline impacts are not considered a factor on water quality. However, at certain times of the year the potential for contamination exists due to the proximity of the North Shore Channel and wet-weather flows. In addition, the proximity to a major shipping lane adds to the susceptibility of these three intakes.

DEFINITIONS & ABBREVIATIONS:

- **Action Level (AL):** The concentration of a contaminant which exceeded triggers treatment or other requirements which a water system must follow.
- **Avg:** Regulatory compliance with some MCLs are based on running annual average of monthly samples.
- **Maximum Contaminant Level (MCL):** The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
- **Maximum Contaminant Level Goal (MCLG):** The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- **Maximum Residual Disinfectant Level (MRDL):** The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
- **Maximum Residual Disinfectant Level Goal (MRDLG):** The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of disinfectants used to control microbial contaminants.
- **mrem/year:** Millirems per year (a measure of radiation absorbed by the body).
- **NA:** Not applicable.
- **NTU:** Nephelometric turbidity units.
- **pCi/L:** Picocuries per liter (a measure of radioactivity).
- **ppb:** Micrograms per liter or parts per billion – or one ounce in 7,350,000 gallons of water.
- **ppm:** Milligrams per liter or parts per million – or one ounce in 7,350 gallons of water.
- **Treatment Technique (TT):** A required process intended to reduce the level of a contaminant in drinking water.

2014 Evanston Water Quality Data

Coliform Bacteria:

MCLG	Total Coliform MCL	Highest No. of Positive	Fecal Coliform or E. Coli MCL	Total No. of Positive E. Coli or Fecal Coliform Samples	Violation	Likely Source of Contamination
0	5% of monthly samples are positive	1.2		0	N	Naturally present in the environment

Contaminant	Date Sampled	MCLG	AL	90th Percentile	# of Sites	Units	Violation	Likely Source of Contamination
Copper	6/2014	1.3	1.3	0.14	0	ppm	N	Erosion of natural deposits; leaching from wood preservatives; corrosion of household plumbing systems.
Lead	6/2014	0	15	3.9	0	ppb	N	Corrosion of household plumbing systems; erosion of natural deposits.

The state requires monitoring of certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of the data, though accurate, is more than one year old.

Disinfectants & Disinfectant By-Products	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Chlorine	2014	0.5	0.4 – 1	MRDLG = 4	MRDL = 4	ppm	N	Water additive used to control microbes.
Haloacetic Acids (HAA5)	2014	9	4.7 – 12	No goal for the total.	60	ppb	N	By-product of drinking water chlorination.
Total Trihalomethanes (TThm)	2014	25	10.6 – 34.5	No goal for the total.	80	ppb	N	By-product of drinking water chlorination.

Not all sample results may have been used for calculating the Highest Level Detected because some results may be part of an evaluation to determine where compliance sampling should occur in the future.

Nitrate (measured as Nitrogen)	4/3/14	0.4	0.4 – 0.4	10	10	ppm	N	Runoff from fertilizer use; leaching from septic tanks, sewage; Erosion of natural deposits.
Sodium*	10/8/14	8	7.8 – 7.8	*	*	ppm	N	Erosion from naturally occurring deposits; Used in water softener regeneration.

*There is no state or federal MCL for sodium. Monitoring is required to provide information to consumers and health officials who are concerned about sodium intake due to dietary precautions. If you are on a sodium-restricted diet, you should consult a physician about this level of sodium in the water.

Radioactive Contaminants	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Combined Radium, 226/228	1/16/14	0.99	0.99 – 0.99	0	5	pCi/L	N	Erosion of natural deposits
Gross Alpha excluding Radon & Uranium	1/16/14	0.16	0.16 – 0.16	0	15	pCi/L	N	Erosion of natural deposits.

*The state requires monitoring of certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of the data, though accurate, is more than one year old.

Turbidity*	Limit (Treatment Technique)	Level Detected	Violation	Likely Source of Contamination
Lowest monthly % meeting limit	0.3 NTU	100%	N	Soil runoff.
Highest single measurement	1 NTU	0.24 NTU	N	Soil runoff.

*Turbidity is a measurement of the cloudiness of the water caused by suspended particles. It is monitored because it is a good indicator of water quality & the effectiveness of the filtration system and disinfectants.

TOTAL ORGANIC CARBON:

The percentage of Total Organic Carbon (TOC) removal was measured each month and the system met all TOC removal requirements set, unless a TOC violation is noted in the violation section.

Unregulated Contaminant Monitoring (UCM)	Unit	Year Sampled	Amount Detected (low-high)	Range of Detection	MCL	Likely Source of Contamination
Chromium	ppb	2014	0.30	0.25 – 0.30	100	Naturally occurring element; used in making steel and other alloys; used for chrome plating, dyes, pigments, leather tanning, and wood preservation.
Chromium 6	ppb	2014	0.21	0.15 – 0.020	*	Naturally occurring element; used in making steel and other alloys; used for chrome plating, dyes, pigments, leather tanning, and wood preservation.
Molybdenum	ppb	2014	1.2	0 – 1.1	*	Naturally occurring element found in ores and present in plants, animals, and bacteria; commonly used form molybdenum trioxide used as a chemical agent.
Strontium	ppb	2014	120	110 – 130	*	Naturally occurring element; historically, commercial use of strontium has been in the faceplate glass of cathode-ray tube televisions to block x-ray emissions.
Vanadium	ppb	2014	0.3	0.23 – 0.33	*	Naturally occurring metal; used as vanadium pentoxide which is a chemical intermediate and a catalyst.

*A maximum contaminant level (MCL) for this contaminant has not been established by either state or federal regulations, not has mandatory health effects language been set. The purpose of unregulated contaminant monitoring is to assist USEPA in determining the occurrence of unregulated contaminants in drinking water and whether future regulation is warranted.

2014 Wheeling Water Quality Data

Contaminant	Date Sampled	MCLG	Action Level (AL)	90th Percentile	# of Sites	Units	Violation	Likely Source of Contamination
Copper	2014	1.3	1.3	0.199	0	ppm	N	Erosion of natural deposits; leaching from wood preservatives; corrosion of household plumbing systems.
Lead	2014	0	15	4.8	1	ppb	N	Corrosion of household plumbing systems; erosion of natural deposits.

*The state requires monitoring of certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of the data, though accurate, is more than one year old.

Disinfectants & Disinfectant By-Products	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Chlorine	12/31/14	1	1 – 1	MRDLG = 4	MRDL = 4	ppm	N	Water additive used to control microbes.
Haloacetic Acids (HAA5) *	2014	16	1 – 19	No goal for the total.	60	ppb	N	By-product of drinking water chlorination.
Total Trihalomethanes (TThm) *	2014	31	19.47 – 41.91	No goal for the total.	80	ppb	N	By-product of drinking water chlorination.

*Not all sample results may have been used for calculating the Highest Level Detected because some results may be part of an evaluation to determine where compliance sampling should occur in the future.

Inorganic Contaminants	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Barium	10/1/12	0.037	0.033 – 0.037	2	2	ppm	N	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits.
Fluoride	10/1/12	1.14	1.06 – 1.14	4	4	ppm	N	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories.
Iron*	10/1/12	0.3	0.23 – 0.3		1.0	ppm	N	*This contaminant is not currently regulated by the USEPA. However, the state regulates. Erosion of natural deposits.
Manganese*	10/1/12	7.9	7.6 – 7.9	150	150	ppb	N	*This contaminant is not currently regulated by the USEPA. However, the state regulates. Erosion of natural deposits.
Sodium**	10/1/12	26	24 – 26	**	**	ppm	N	Erosion from naturally occurring deposits; used in water softener regeneration.
Zinc*	10/1/12	0.0082	0 – 0.0082	5	5	ppm	N	*This contaminant is not currently regulated by the USEPA. However, the state regulates. Erosion of natural deposits.

**There is no state or federal MCL for sodium. Monitoring is required to provide information to consumers and health officials who are concerned about sodium intake due to dietary precautions. If you are on a sodium-restricted diet, you should consult a physician about this level of sodium in the water.

Radioactive Contaminants	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Uranium	10/7/13	0.45892	0.44253 – 0.45892	0	30	ug/l	N	Erosion of natural deposits
Combined Radium, 226/228	10/7/13	13.92	7.22 – 13.92	0	5	pCi/L	N	Erosion of natural deposits
Gross Alpha excluding Radon & Uranium	10/7/13	28	19.8 – 28	0	15	pCi/L	N	Erosion of natural deposits.

The state requires monitoring of certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of the data, though accurate, is more than one year old.

Unregulated Contaminant Monitoring (UCM)	Unit	Year Sampled	Amount Detected (low-high)	Range of Detection	MCL	Likely Source of Contamination
Chlorate	ppb	2014	36	27 – 45	100	Agricultural defoliant or desiccant; disinfection byproduct; and used in production of chlorine dioxide.
Chromium	ppb	2014	0.27	0.25 – 0.30	*	Naturally occurring element; used in making steel and other alloys; used for chrome plating, dyes, pigments, leather tanning, and wood preservation.
Chromium 6	ppb	2014	0.18	0.15 – 0.020	*	Naturally occurring element; used in making steel and other alloys; used for chrome plating, dyes, pigments, leather tanning, and wood preservation.
Molybdenum	ppb	2014	1.1	0 – 1.1	*	Naturally occurring element found in ores and present in plants, animals, and bacteria; commonly used form molybdenum trioxide used as a chemical agent.
Strontium	ppb	2014	120	110 – 130	*	Naturally occurring element; historically, commercial use of strontium has been in the faceplate glass of cathode-ray tub televisions to block x-ray emissions.
Vanadium	ppb	2014	0.27	0.23 – 0.33	*	Naturally occurring metal; used as vanadium pentoxide which is a chemical intermediate and a catalyst.

*A maximum contaminant level (MCL) for this contaminant has not been established by either state or federal regulations, nor has mandatory health effects language been set. The purpose of unregulated contaminant monitoring is to assist USEPA in determining the occurrence of unregulated contaminants in drinking water and whether future regulation is warranted.

Water Infrastructure Maintenance and Replacement

The replacement and repair of water-related infrastructure is continually being performed in the Village of Wheeling. This includes both above and underground infrastructure. The Village has seven (7) water storage tanks that require painting every 25 years and two (2) emergency back-up wells that require refurbishing every eight (8) years. The maintenance of water pumping stations is an ongoing task that requires proper planning and coordination to ensure the uninterrupted flow of potable water to consumers.

The Village of Wheeling has over one hundred and sixty (160) miles of water main. Replacement of existing thin wall cast iron water mains within various older subdivisions is scheduled every other year. The failures of water main include many issues such as poor soil conditions, stray electrical current, depth of bury, and poor pipe quality. Prioritizing water main replacements is based on factors such as failure rates, scheduled road replacement, and ease of construction.

The Village also maintains over 1,600 fire hydrants and performs a type of hydrant flushing called Unidirectional Flushing (UDF). UDF is an excellent, water-effective method of cleaning pipes to improve the quality of water, improve the carrying capacity of pipes, and benefit the operation of the water system. It is a process that closes valves and opens hydrants to move clean water down a single water main. With this method, which also eliminates other flows, the higher velocity scours the pipe and removes sediments, biofilm, corrosion product, and tuberculation from the pipes. Not only is UDF a more effective way of cleaning than convectional flushing, but it also uses nearly 40% less water.

Water Restriction Reminder

As part of preserving our water resource, the Village reminds consumers that non-essential use of water is prohibited every day from May 15th to September 15th between the hours of 12:00 pm and 6:00 pm. Types of non-essential use include, but are not limited to, lawn irrigation, washing vehicles, using hoses for clean-up, and washing/pressure-washing streets, sidewalks, parking lots, paved areas, and building exteriors.

Summer Property Maintenance

Community Development property maintenance staff will be out in force this summer ensuring that properties in our community are observing the following property maintenance requirements:

- Maintain grass and weeds (maximum height eight inches).
- Maintain shrubs and trees, including removal or pruning of dead, overgrown, or improperly maintained plants.
- Keep building exterior free of cracking and peeling paint.
- Keep fences, sheds, and other accessory structures in good repair.
- Stow garbage cans in the garage or adjacent to the house in a side or rear yard between pick-up days.

If you notice ill-kept properties in your neighborhood, please contact Community Development at 847.459.2620 so that our staff can investigate the status of the properties and take steps to re-establish maintenance.

Do You Need a Permit?

Before you build or remodel structures within the Village, it is likely you will need to obtain a permit. The Building Division is involved from the plan review process through the final onsite inspection to make sure building and remodeling projects comply with current life-safety building codes. Permit forms are available on the Village website. If you are unsure whether you are required to have a permit for work on your property, please inquire through Community Development at 847.459.2620.

Home improvements requiring a permit:

House addition or remodeling	Fireplace
Window/Door replacement (with size change)	Alarm system
Stoop replacement	Garage
Gazebo electrical or plumbing work	Shed
Central air conditioning	Furnace
Driveway/Sidewalk/Patio	Lawn sprinkler
Pool/Spa/Hot tub	Deck/Porch
Water heater replacement	Sewer repair
Roofing/Siding	Fence
Satellite dish	

Emerald Ash Borer

The Emerald Ash Borer (EAB) is a destructive, non-native insect that can be found only in Ash trees. As an adult, it is a small metallic-green beetle about a 1/2 inch long and 1/8 inch wide that can fly at least 1/2 mile from the tree where it emerges. Its larvae burrow into the bark of Ash trees, causing the trees to starve and eventually die. Signs that an Ash tree could possibly be infested by an EAB include thinning of the tree's top canopy, sprouts from the trunk after the upper portion of the tree is deceased, and "D" shaped holes in the bark (roughly 1/8 inch in diameter).

The Village of Wheeling is closely monitoring the Village's parkway Ash trees. In 2014, approximately 650 parkway trees were removed due to EAB. Residents who suspect that a parkway tree is infested can contact the Public Works Department at 847.279.6900. For more information on the EAB, residents are encouraged to visit the Illinois Department of Agriculture website at www.IllinoisEAB.com.

Protect your Home Against Mosquitoes

Mosquitoes can develop in water that has been stagnant for more than five days. They can breed in a small amount of water the size of a bottle cap. Please follow these tips to reduce the mosquito population and prevent the spread of West Nile Virus:

- Remove containers that can hold water from your front and back yards. Play tires should have holes drilled through them to prevent water from accumulating.
- Empty plastic wading pools weekly or store upside down.
- Do not allow water to collect in pool covers.
- Do not allow swimming pools or hot tubs to be neglected.
- Stock ornamental ponds with mosquito-eating fish such as goldfish or minnows.
- Store boats, garden equipment, and toys covered or upside down.
- Empty and refill water bowls for pets daily.
- Change bird bath and plant saucer water every few days.
- Keep weeds and grass cut short.
- Keep home screens in good repair and tight-fitting.
- Keep gutters free of debris and in good repair.
- Repair leaky outside faucets.

Protect Yourself and Your Family

- If you are going out between dusk and dawn, remember to wear long sleeves, pants, socks, and shoes.
- Apply insect repellent with DEET, picaridin, or oil of lemon eucalyptus according to the labeled instructions.

Report Dead Birds

If you find a dead bird and the carcass doesn't have any outward signs of trauma, call Health Officer Beverly Slaby at 847.499.9045. Birds that have an odor, maggots, deflated eyes, or visible wounds will not be accepted for testing; double-bag these birds and discard them in the trash. If the bird is acceptable, it will be tested for West Nile Virus. Acceptable birds include crows, blue jays, grackles, starlings, robins, cardinals, sparrows, and finches.

HUMAN SERVICES DEPARTMENT

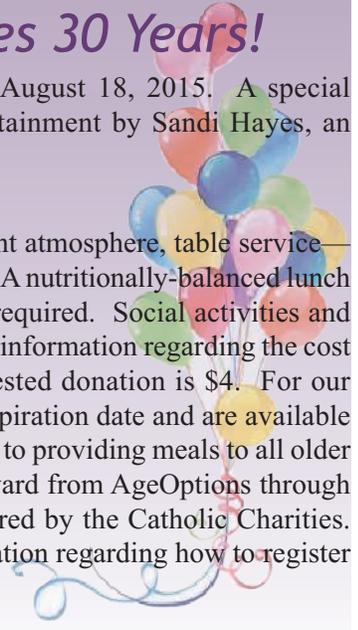

Pavilion Senior Center & Social Services Division

The Wheeling Pavilion Senior Center Celebrates 30 Years!

Join us as we celebrate the 30th anniversary of the Wheeling Pavilion Senior Center on August 18, 2015. A special anniversary meal will be served during our regular Lunch at Pavilion meal service. Entertainment by Sandi Hayes, an exceptional performer and entertainer, will also be provided.

Lunch at Pavilion

Join us for a great meal and great friends at Lunch at Pavilion. NEW menu selections, restaurant atmosphere, table service—you can't beat it! The Wheeling Senior Center hosts meal service for anyone 60 years and better. A nutritionally-balanced lunch is served Monday, Wednesday, and Friday from 11:30 a.m. until 12:30 p.m. Reservations are required. Social activities and informational presentations are included as part of this program. Each diner will receive written information regarding the cost of the meal and will have the opportunity to contribute to part or all of the cost. The suggested donation is \$4. For our frequent diners, we have a five-meal punch card for a donation of \$15. These cards have no expiration date and are available at the Wheeling Pavilion Senior Center front desk. The Lunch at Pavilion program is committed to providing meals to all older adults 60 and better, regardless of ability to pay. Funds for this program are provided by an award from AgeOptions through the Illinois Department on Aging and the Federal Administration on Aging. Meals are prepared by the Catholic Charities. Lunch is often followed by a presentation, speaker, or musical entertainment. For more information regarding how to register or volunteer, please contact the Senior Center at 847.459.2670 and ask for Jesus Delgado.

Activities at the Wheeling Pavilion Senior Center

Register for these programs at the Wheeling Pavilion Senior Center (199 N. First Street) or by calling us at 847.459.2670.

Osteoporosis Presentation & Screening

On Monday, July 20, staff from CJE Senior Life will be at the Senior Center to give a presentation on osteoporosis and ways to minimize the impact it can have on your life. Free basic osteoporosis screenings will be available.

Legacy Girls at Chandler's Chophouse

Join the Legacy Girls as they entertain us with the music of The Andrews Sisters. Before the show, enjoy a delicious family-style meal including roast sirloin, stuffing, cranberry sauce, potatoes, vegetables, bread and butter, beverage, and dessert.

Date: Thursday, July 23, 2015

Location: Chandler's Chophouse in Schaumburg

Time: Meet at the Senior Center at 10 a.m.

Cost: \$52 members/\$67 non-members by July 1. \$57 members/\$72 non-members July 2 – July 9 if space is available.

Utility Bill Clinic

Join State Representative Carol Sente and the Citizens Utility Board for a utility bill clinic. Bring your gas, phone, and electric bills to the Senior Center for a FREE one-on-one analysis.

Date: Monday, July 27, 2015

Time: 12–2 p.m.

Cost: Free, but reservations are requested by contacting Rep. Sente at 847.478.9909 or repsente@gmail.com.

Telephone Reassurance Program

The Telephone Reassurance Program serves individuals ages 60 and older living alone and in need of a daily reassurance call. Calls are made by trained volunteers every morning between 8:45 and 9 a.m. In addition to ensuring the physical well-being of the residents, the program also helps by reducing loneliness and providing an opportunity to be in contact with another person. For more information please call 847.459.2606.

School Supply Drive to Help Needy Families

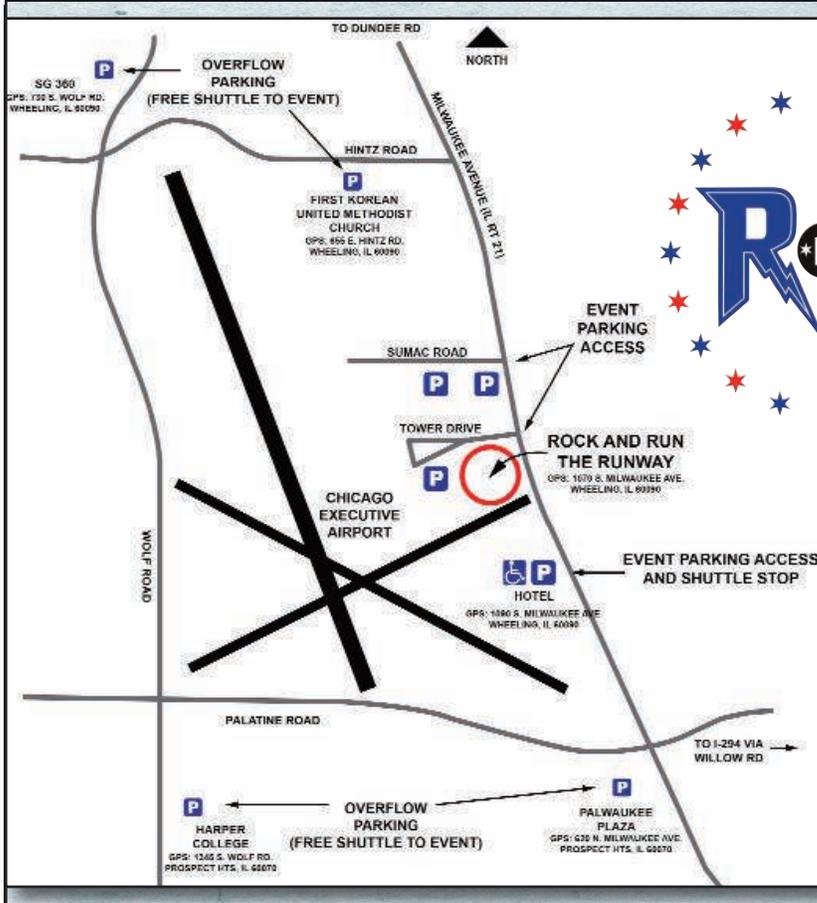

***July 15-August 14, 2015
Wheeling Pavilion Senior Center
199 N. First Street***

School supplies are being collected for needy families in the Village of Wheeling and throughout Wheeling Township. Please bring new school supplies to the Senior Center between the hours of 8 a.m. and 4 p.m., July 15–August 14. Items needed include crayons, pencils, pens, notebooks, loose-leaf

paper, glue, markers, colored pencils, erasers, folders, etc. If you have questions or for more information, call 847.459.2606.

COMMUNITY NEWS & EVENTS

Rock 'n' Run the Runway Event Information

We are excited to offer a new venue for this year's fireworks show—Chicago Executive Airport! This joint event hosted by Wheeling, Prospect Heights, and Chicago Executive Airport will be held on Friday, July 3. The day will be begin with a 5k run on the airport runway at 8 a.m. and pick back up with food trucks and live music by *Midnight* and *...And Beyond* at 5 p.m. Fireworks will take place at dusk, approximately 9:15 p.m. There will be plenty of parking options (see map to the left) which include overflow parking lots offering free shuttle buses to the event location. Bring your family, lawn chairs, and an appetite to this community event!

Wanted: Houses Seeking Curb Appeal

The 28th annual Community Paint-A-Thon will be held on Saturday, September 12. While the date is a long way off, applications are now available. If the exterior of your house needs to be painted due to peeling, fading, or worn paint, consider applying. The program provides for the painting of the exteriors of single-family homes at no cost to those who qualify.

To qualify, homes must be owned and occupied by people with limited financial resources, and the owners must be at least 60 years of age or have a permanent disability that hinders them from doing the work themselves. Once a home is determined eligible, volunteer teams are matched to do the scraping, priming, and painting of the house. The Community Paint-A-Thon covers ten townships including Barrington, Elk Grove, Hanover, Maine, New Trier, Niles, Northfield, Palatine, Schaumburg, and Wheeling.

The Paint-A-Thon is a major community-wide event. Teams of volunteers are recruited from businesses, churches, and social and civic groups. If you are interested in volunteering, please contact Annette Sommer at HandsOn Suburban Chicago at 847.228.1320. If you or someone you know needs their home painted, please contact Catholic Charities at 847.253.5500.
