

Village Views

WHEELING, ILLINOIS

MARCH/APRIL 2002

The Future of Wheeling: Comprehensive Planning Process Begins

The Wheeling Board of Trustees and the Plan Commission have embarked on a year-long project to revise the Village's Comprehensive Plan. The plan is an effort to set the development agenda for the next 20 years. It will help establish priorities and direction for residential, commercial and industrial properties.

The Board approved the hiring of Chicago planning firm Camiros to guide the project. The company has already begun analyzing and evaluating raw data, such as census figures and land-use surveys.

Create Electronic Map

The data will form the foundation of an electronic map, constructed by

Camiros, that will provide Village planners with a visual representation of where Wheeling is today and what impact current trends hold for the future.

"The Comprehensive Plan is not a simple document," said Village Planner Jeffrey Harris. "It will detail a complex strategy to direct Village growth for the next two decades. It will help us resolve such questions as, how do we want to develop a proposed downtown center? What street plans do we have in place?"

In addition to setting the tone for future Village growth, the plan will suggest, in the case of commercial and industrial properties, what incentives need to be developed to provide for that growth. The Village currently is working with two tax increment finance districts

and has, at various times, issued special (6b) bonds to encourage business expansion.

All real estate in Wheeling will be reviewed to determine whether development priorities should shift more toward residential, commercial or industrial properties. The land under review

includes three parcels currently in unincorporated Cook County that are surrounded by Wheeling and is subject to possible annexation.

"The comprehensive plan . . . will detail a complex strategy to direct Village growth for the next two decades."

Public Meetings Planned

At least four public meetings will be held to seek input from residents about how they would like to see the Village proceed. The date for the first meeting has not yet been set, but it's likely to be held in late April.

The Plan Commission expects to finish work on the plan by early 2003. The Board of Trustees will vote on the final document shortly thereafter. The current comprehensive plan was developed in 1985 and updated in 1997.

Dancing INTO SPRING

They danced the night away at the annual late-winter event, "Dancing into Spring," at Chevy Chase Country Club. Proceeds from the dance, organized by the Special Events Committee, are applied to July 4 festivities.

“The Village’s subdivisions are fully lighted. Residents appreciate the poles, which are not only new and fresh but have all the junction wiring enclosed and out of sight.”

— Street Supervisor Jeff Kopper

2002 Capital Improvements Program Set

Wheeling’s long-term facelift efforts will get a boost in 2002, with the Public Works Department planning several extensive capital improvement projects.

The Dunhurst I & II subdivisions will see water main replacement, completing work begun last year. The new water mains, constructed of ductile iron, replace aging cast-iron pipes that account for a significant failure rate.

“This is an ambitious project,” said Water Division Supervisor Scott Lark, “but the residents’ quality of life will improve significantly. We won’t have to dig up the parkway as often, and residents won’t lose service when the old mains fail and water service has to be shut off.”

Public Works is also embarking on the fourth year of a 10-year program to install street lighting in many neighborhoods. The first three years of the program involved installation of new lighting in areas that were unlit. This year, Public Works may start replacing up to 54 wooden, and often deteriorated, ComEd poles with aluminum poles that are standard elsewhere in the Village.

The work will focus on Hollywood Ridge, Poplar Grove and Dunhurst IV subdivisions. State highways under IDOT’s control, such as Dundee Rd., are not affected by the lighting program, currently budgeted at \$195,000 a year.

“There are no more lighting gaps in the Village. The Village’s subdivisions are fully lighted,” said Street Supervisor Jeff Kopper. “Residents appreciate the poles, which are not only new and fresh but have all the junction wiring enclosed and out of sight.”

Modify Diversion Channel

The recently completed Wheeling Diversion Channel may be modified this year to accommodate fiber optic cables owned by Ameritech. The phone company wants to install a box culvert at the north end of the channel as a support for its cables. Ameritech has committed \$275,000 to the project – a joint effort with the Village, whose involvement has yet to be determined.

Kids Benefit from Awareness Training

After playing the “friendly stranger,” Wheeling Police Corporal Mike Rompala demonstrates for a second-grader at Jack London School what happens when children get too close, don’t run and fail to sound a loud alarm. About 30 children went through several days of awareness training. The classes are an outgrowth of efforts over the last two years to instruct women how to be more aware of their surroundings and the people around them. The Wheeling Police Department wanted to apply those lessons to help children who might be approached by a ‘friendly stranger’ and prevent abduction.

Senior Commission Plans Summer Concert Series

The Wheeling Senior Citizens Commission has begun planning a series of jazz concerts at the Pavilion Senior Center in June, July and August. These events will be family affairs held on Sunday afternoons. For information, contact the Pavilion Senior Center at 847-459-2672 and see future issues of *Village Views*.

Sabre Joins the Force

Sabre is an eager, young pup, raring to go. A genuine German police dog born in Germany, he's alert and panting with anticipation as Wheeling Officer Mike Porzycki freezes. Sabre halts in mid-pant, waiting, eyes darting warily. Then the command comes: "TAKE him!" Sabre lunges, and Porzycki unleashes the dog.

Sabre is the latest addition to the Wheeling P.D. He and Porzycki have just completed eight weeks of intense training at Tops Kennels in Grayslake, which has been training dogs for 28 years. Tops takes advantage of Sabre's natural play drive and uses it as motivation to find drugs and pick up human scent.

The cooperation between these two partners is precise. Man and dog are locked on one objective: the suspect. It's the way they fight crime in the Wheeling Police Department's 14-year-old Canine Unit. Now, the new team is officially on patrol, where Sabre strikes fear in the hearts of thieves, robbers and raiders. That's the idea.

"A well-trained dog can detect and locate drugs, find evidence, and apprehend offenders who believe they have outwitted the police," said Porzycki. Dogs have played a significant role in Wheeling's crime-fighting efforts since 1987. Sabre's predecessor, Nitro, retired in early 2001. He had reached his golden years, and it was time for a rest. It took from then until now to identify a suitable replacement dog and train him and his handler, Porzycki, for work on the streets that are the precinct of the night shift.

"Lots of things go on after dark," said Porzycki. "Sabre gives us the ears and the nose that we humans don't naturally have to detect things that go bump in the night."

Sabre is a German shepherd, one of the best breeds for this work, born in Germany in 1999. He migrated to the U.S. in 2000 and began his training last year. He attracted the attention of trainers looking for the qualities that comprise a top-quality police dog. He had that alertness, that attention to detail, that play drive.

"Nitro had it for nine years. He earned his place," said Porzycki. "I anticipate Sabre will serve residents for at least that long."

Police handlers retire from the Canine Unit when their dogs do. That's what happened with Nitro and his partner, Officer Randy Olsberg. The dogs, whether on active duty or in retirement, become part of the family. When their crook-hunting days are over, they spend their time remembering what it was like when the pup was young and raring to go.

A STRIKE! Sabre paws eagerly and clues Officer Mike Porzycki to something that needs further investigation. The canine team trains weekly in suburban Lake County.

Wanted: Names of Wheeling Homeowner Representatives

If you are a homeowner association president or represent a neighborhood or housing complex in Wheeling, we'd like to know how to get in touch with you. Having an up-to-date list of homeowner association presidents enables us to send timely information that can be included in your newsletter or posted in lobbies, club houses or common areas. Please complete the form at left and mail or fax it to us.

"We recognized the deteriorating condition of Dundee Rd. and encouraged IDOT to resurface the roadbed ... the improvements will provide motorists with smoother driving."

— Acting Public Works Director, Guy Kolberg

Road-Construction Season: How It Will Affect Wheeling

Dundee Rd. is set for repaving. The McHenry Rd. bottleneck is about to be unblocked. And Wolf Rd. has been targeted for widening.

The Illinois Department of Transportation (IDOT) plans to begin work on Dundee Rd. in late April or early May. Plans call for patching, milling and repaving the busy Rte. 68 from Kennicott Rd., east of Rte. 53 (Arlington Heights), to Milwaukee Ave. in Wheeling and on to Waukegan Rd. in Northbrook. The project will complete the resurfacing of Dundee Rd. as it connects to a job finished last year from Waukegan Rd. east.

"Since this is not a Village of Wheeling project, unfortunately we have little control over construction schedules," said Acting Public Works Director Guy Kolberg, "But we recognized the deteriorating condition of Dundee Rd. and encouraged IDOT to resurface the roadbed as soon as practical. There will be temporary dislocation of traffic, but the resulting improvements will provide motorists with smoother driving."

Plote Construction Co., of Elgin, was the low bidder and has been awarded the \$5.5 million contract. Construction is expected to start in early spring, with a completion date of July 28, according to IDOT. Traffic in the construction zone will be limited to one lane in each direction. Left turns will be prohibited at various times, but so-called "right-in, right-out" turns will not be affected.

Permanent overnight lane closures will occur until July 1, so construction crews can patch the concrete between Kennicott Rd. and Milwaukee Ave. After July 1, crews will work days only, with no nighttime lane closures. IDOT anticipates relatively few repairs to the roadbed, although some manhole covers will have to be raised to be flush with the new surface.

Route 83 Improvements

IDOT is also poised to make significant improvements on IL Rte. 83 from Dundee Rd. to Lake Cook Rd. in Wheeling. Construction will begin in late summer or early fall with utility work involving ComEd and Nicor Gas.

The \$8.1 million project will replace the current drainage ditches with underground storm sewers. The sewer work will be done in stages, first on one side of the street, then on the other.

The present two-lane roadway will be removed and replaced with four lanes plus a left-turn lane serving both directions. The temporary traffic light at the intersection of McHenry Rd. and Lexington Dr. will become permanent. The intersection of McHenry Rd. and Rte. 83 will be widened and resurfaced. Engineers also will make modifications to the traffic signals. The project will be completed by late fall, 2003, with the exception of tree and shrubbery planting.

Bridge Over Railroad Tracks

Road
Construction
Ahead

Continued from page 4

began work on the highway bridge over the Canadian National Railroad tracks on Lake Cook Rd. in mid-February. The bridge, between Northgate Pkwy. and Lexington Dr., will be widened, and one additional lane will be built in each direction. A five-foot sidewalk will be installed on the south side of the bridge. An 18-foot sidewalk will be added on the north side to accommodate pedestrians and bicyclists. The north sidewalk will connect with a proposed bicycle trail west of the bridge.

The early substructure bridgework will have little impact on traffic. However, CCHD anticipates that, starting in March, traffic will be redirected to two lanes on one side as work proceeds on the remaining two lanes and the construction of a third. The \$6.4 million project is scheduled for completion by November 29, 2002.

Widen Wolf Road

Looking ahead, IDOT is planning to widen Wolf Rd. with the addition of a left turn lane serving both directions. The work will affect the area between Manchester Dr. and Milwaukee Ave. The project is scheduled for contract letting in late fall, 2003, and will involve the installation of storm sewers and 5-foot sidewalks. The temporary traffic light at the corner of Strong Ave. will become permanent. When IDOT completes the work to the Village's satisfaction, control of that section will revert to the Village.

Refuse Contract Renewed; Seniors Get Discount

The Village has signed a two-year extension to the contract for refuse removal with Waste Management Northwest. The agreement has no price increase for the first year and caps possible future increases in the second year at no more than three percent. As part of the new deal, Village seniors will get a 25 percent discount from regular waste removal rates.

The discount is not automatic. Seniors over age 65 need to complete a discount application, which is available at

Village Hall, 255 W. Dundee Rd., or at www.vi.wheeling.il.us. Then click on Reference Desk | Forms and Permits | Refuse Discount Application: Seniors. For more information, call Village Hall at 847-459-2600.

Waste Management will also issue a magnetic reminder of days refuse pickup will be delayed.

Natural Gas Leaks and Your Safety

by Fire Chief Keith MacIsaac.

Many homes and businesses use natural gas for heat, to heat water and to cook food. Because natural gas is colorless and odorless, a special material is added to give the gas its unique smell (like rotten eggs).

The odorant is a marker to let you know if a natural gas leak occurs. You can smell it long before a serious buildup of natural gas occurs and becomes a fire hazard.

In older Wheeling subdivisions, it is not uncommon for minor natural gas leaks to occur in the service line going from the main distribution line to the gas meter on the building. These leaks develop over many years of soil compaction and freeze/thaw cycles that cause stress to the steel fittings on the service line.

The leaks usually occur at the junction of the service line and the gas meter (next to the house) or at the connection between the service line and the main distribution line near the street (away from the house).

Never attempt to repair an outside gas leak yourself. You might make the situation worse.

If a gas leak occurs in or outside your home or business, you should immediately call 9-1-1 and request the Wheeling Fire Department. Leave the building and meet the fire department outside. Fire department personnel will use specialized metering equipment to determine if a hazard exists.

In the case of a very small leak near the street, you should contact Nicor Gas at 888-642-6748. A Nicor representative will assess the leak and arrange for repairs. If you are unsure what to do and smell natural gas outside, call 9-1-1 and request the Fire Department.

If there is no immediate hazard to you or the community, Nicor will schedule repairs. In some cases, these repairs may not occur for several weeks, depending upon weather conditions and the availability of construction crews.

Until the repairs are completed, you may still catch an occasional whiff of natural gas outside from time to time. Once Nicor has evaluated the site, even if you smell trace amounts of natural gas, there is no immediate hazard.

"As part of the new deal, Village seniors will get a 25 percent discount from regular waste removal rates."

Seniors Needed to Teach Computer Classes

The Pavilion Senior Center is organizing computer classes and needs some senior volunteers with basic computer skills to teach the courses. Senior Net, a national organization based in California, provides the training materials. "Volunteers do not have to know how to teach," said Director of Senior Citizens Services Nancy Janssen, "we'll teach them." Teacher instruction will begin in May. Community classes will follow later in the year. For information, call 847-459-2672.

Briefs and Announcements

Volunteers Needed for Community Disaster Drill

The Village of Wheeling and METRA will host a community disaster drill, Saturday, May 18th. Volunteers are needed from 7:30 a.m. until 2:00 p.m. to serve as "patients" and "passengers" on a commuter train involved in a simulated accident. Volunteers must be at least 13 years old and accompanied by an adult if under 17.

For more information, contact the Wheeling Fire Department at 847-459-2662 during normal business hours.

Paint-A-Thon Houses Sought

Planners of the 2002 Paint-A-Thon in the northwest suburbs are seeking

appropriate houses for this year's paint-up, spruce-up effort. The program is available to seniors over 60 and handicapped homeowners of any age who are unable to paint themselves.

Income requirements are \$25,000 or less in annual income and a monthly household income of \$2,083. Unusual expenses, such as prescriptions, will be considered. Applications are available at the Senior Center, Village Hall and Indian Trails Library. For more information, contact Nancy Janssen, Director of Senior Citizens Services, at 847-459-2672.

Fire Department Provides Alarm Assistance

Not sure where to install smoke detectors? Or perhaps what type of fire extinguisher to buy? Or how to

Three Commissioners Take Seats; Fourth Is Sought

Wheeling President Greg Klatecki has named three Village residents to fill vacancies on three commissions.

Steven Boime, 47, formerly a member of the Human Rights Commission, will sit on the Plan Commission. He is a former president and currently vice president of the Tahoe Village Condominium Association and a member of the Willow-Palatine Rd. Community Mobilization Team. An avid bicyclist, Boime is controller of Inplex, custom extruders of plastic tubing and profiles in Des Plaines.

Boime said he wants "to see Wheeling continue to progress and achieve a better quality of life. The Plan Commission is working on the Village's comprehensive plan, which is a great opportunity to ensure that we are everything we can be in Wheeling."

David Kolssak joins the Economic Development Commission. A Wheeling resident since age four, Kolssak attended Purdue University, where he received a management degree in

1991. He is managing partner at Turnkey Network Systems in Wheeling. Now 32, Kolssak said, "I would like to be more aggressive in courting businesses and new technologies to the area. I want to make sure people looking to relocate their businesses look at Wheeling."

Twenty-eight year resident Barbara Steinberg has taken a seat on the Senior Commission. Before retiring a year and a half ago, she worked for 20 years at Love Controls, an engineering company formerly based in Wheeling. Steinberg, 64, said she wants to "give back to the community now that our family is grown." She has been an active volunteer in local schools and at Lutheran Church of the Good Shepherd.

President Klatecki is seeking a suitable replacement to fill Steven Boime's former seat on the Human Rights Commission.

Look Homeward

This Gulfstream turbo-prop, its wings trimmed, faced its past as it took a last ride up Milwaukee Ave., headed for the Joint Fire Training Facility in Buffalo Grove.

The fuselage had been stored at Palwaukee Airport. It was previously owned by singer Wayne Newton and will be used as a training "prop" for firefighters who might have to respond to an airport incident. Four area fire departments use the facility. Wheeling Fire Department coordinated the move.

SPEAK OUT

Communicate with Wheeling elected officials and administrators. Your advice, suggestions, questions and opinions are appreciated and **will receive response**. Please complete this form, detach and return to: Village Manager, Village of Wheeling, 255 W. Dundee Road, Wheeling, IL 60090.

change batteries in your home alarm if your health is an issue? The Wheeling Fire Department is ready to assist. For information and help with smoke detectors or carbon monoxide (CO) detectors, call the Fire Department at 847-459-2662.

However, If you suspect a CO problem in your home or business, call 9-1-1 for immediate assistance from the Fire Department.

Parkway Tree Trimming to Start in March

Tree-trimming crews from the Department of Public Works are scheduled to begin work in early March. The 2002 program will focus on the following subdivisions: East Dunhurst - Units 1 & 2; Longtree/Kingsport; and Ridgefield.

Public Works notes that the regular pruning and trimming of parkway trees is important to preserve the health and appearance of the trees and prevent damage to life and property. Various live limbs will be trimmed to restore the shapes of trees, while dead, hazardous, and low hanging live limbs will be removed to protect pedestrians and vehicles.

Community Calendar:

What's Happening in Wheeling on...

March

13- Blood drive, Main Fire Station, 255 W. Dundee Rd., 2:30-7p.m.

17- Pancake Breakfast, St. Joseph the Worker church, 181 W. Dundee Rd. 7:30-11:30 a.m. Proceeds benefit July 4 celebration.

19- Primary Election

April

7- Spaghetti Dinner, Am-Vets, 700 Old McHenry Rd., noon-5 p.m. Proceeds benefit July 4 celebration.

Schedule of Regular Meetings

Village Board — Every Monday, 7:30 p.m.

Plan Commission — 2nd and 4th Thursdays of the month, 7 p.m.

Board of Health - 4th Tuesday, every other month, 7 p.m.

Human Rights Commission — 3rd Tuesday of the month, 7:15 p.m., south half of Village Hall lunch room.

Senior Citizens Commission — 3rd Monday of the month, 10 a.m., Village Hall, south half of lunchroom.

Fire and Police Commission — 3rd Tuesday of the month, 7 p.m., Fire Department training room.

Palwaukee Airport Commission — 3rd Wednesday of the month, Committee of the Whole meeting, 7 p.m., regular meeting, 8 p.m., Airport offices, 1020 South Plant Rd.

Economic Development Commission— 1st Tuesday of each month, 8 a.m. , south half of Village Hall lunch room.

Board of Ethics — 3rd Thursday of January, April, July and October, 7 p.m., south half of Village Hall lunch room.

Attend Public Meetings

Residents are invited to attend public meetings of Village boards and commissions. Most meet in the Village Hall Councilroom, unless otherwise noted at left.

Wireless 911 Service Launched

Wireless 911 service has arrived in Wheeling for cell phone and personal communication users. The system provides immediate access to both fire and police departments during emergency situations.

Before the system was fully implemented in late December, callers were required to contact their wireless operators, who attempted to route the call to the appropriate public safety agency. If callers dialed 911 on their cellular phone, they received a recording that the service was not available in this area. Now, the nearest transmission tower takes the wireless 911 call and routes it to the dispatch center.

Wheeling shares its system with the Village of Glenview, which hosts the primary equipment facility. The state-of-the-art installation provides dispatchers with the caller's wireless number, the name of the registered user, location of the transmission tower, and the direction of the call from the tower (north, south, etc.).

The project required the installation of new receiving equipment and multiple phone lines in the new dispatch center, located in the Glenview Fire Department, as well as development of a computer

database based upon the geographic boundaries of the Village of Wheeling.

"Most wireless emergency calls eventually involve the fire department," said Wheeling Fire Chief Keith MacIsaac. "Police calls are immediately routed to Wheeling Police Department dispatchers."

MacIsaac anticipates that, as technology advances, the system will be tied into global positioning satellites within the next five years. "When that happens, we'll be able to pinpoint the caller's position within a few feet instead of several yards."

Begun in 1999, the project required coordination with all wireless providers and potential receivers of calls (such as Cook and Lake County Sheriff's Departments; Illinois State Police; the Village of Northbrook; and Northwest Central Dispatch, which covers Prospect Heights, Arlington Heights and Buffalo Grove).

During the development period, the number of service providers shrank to seven from 11 due to consolidations and takeovers. The providers currently serving Wheeling include Cingular, Primeco, AT&T Wireless, Voicestream, Verizon, Sprint PCS, and Nextel.

Wheeling to Begin Board Telecasts

The Village will begin televising meetings of the Board of Trustees on March 11. The meetings will be aired live on cable Channel 17 and also taped for later rebroadcast.

The two cameras installed in the Councilroom will be manually controlled. The Village is seeking volunteers to direct the shots and handle other related duties as required. Those with a background in video production are especially encouraged to apply.

For the present, the videotapes will be archived. Later, the Village anticipates possibly upgrading the system by adding a digital video disk (DVD) recorder for longer recording time and easier storage.

SoundVision of Elgin began installing the cameras, lights and an upgraded sound system in early January.

For more information, call Acting Village Manager Jim Grabowski at 847-459-2617.
